The Bridge of Arts

On the Pont des Arts, my heart wobbles, between two waters, the air is so good, this air so pure, I breathe it, our reflections perched, on this bridge "... 6. Tips Profile Photos

Pass a profile picture? Nothing too complicated, indeed, you just have to follow these few tips to look like a real "movie star".

We all wonder how our celebrities do to be radiant on all the clichés. Is this the camera that is of good quality? Or the photographer who is an expert? Rest assured, none of this is true.

Indeed, the stars have secrets to succeed each of their profile pictures. If you want to know which ones, we'll all tell you in the sequel.

01 - Showing yourself in your best light

A dignified profile picture is not improvised. When you want to look splendid, you prepare. To do this, start by freshening up (wash your face and brush your teeth). After drying your face, remember to make it up slightly. Above all, no mascara! Indeed, in a profile picture, your viewer is at a very close distance to you (sometimes less than 30 cm), which amplifies your makeup.

Also, since this is your profile picture, it is your figure that will be more prominent. Remember to do your hair and wear nice clothes. Keep it simple and original.

02 - Use soft lighting and a non-intrusive background

When taking a photo, the lighting can change everything. No matter what's behind you, soft lighting is what you need. If you don't have a special flash or lighting, the light on the side should be your ally. Remember to get closer to the window so that you are lit. Careful! Don't stand in front of the window, this can create too bright waves on your photo. Once the right lighting is found, think of the background. Opt for a solid background rather than a background with all kinds of colors.

03 - Fold your eyes

The success of your profile picture depends on your body language. Indeed, the latter is centered on two main points: your eyes and your mouth.

Your eyes express confidence! The more confident you seem on your shot, the more people will trust you. Take this detail seriously and squint your eyes slightly. Remember, this is part of a strategy used by celebrities.

04 - Make a tiny smile

Your smile is certainly the most important factor for your profile picture. It expresses self-confidence. In addition, the smile is contagious, it will transmit the good mood to all your visitors. Remember, your smile shouldn't be too big. It should be tiny and match perfectly with the expression of your face.

05 - Highlighting your jaw on your profile picture

For everyone, the underside of your jaw is an unattractive area. So remember to hide it, step back head forward and pull the muscles in this area. This will make the double mounts disappear and bring out the shine of your neck.

06 - Fix the camera directly to get your

profile picture right

You don't have to reinvent the wheel. Keep it simple! A nice profile picture is the one you fix the lens. The person who looks at you must be able to read your eyes. Remember, in normal life, we look at people when they talk.

[Retour au sommaire](#)

07 - Squeeze your arms tightly to your body

Maybe you're a body builder and you want to look wider, but to get your shot right, we want to do the opposite. Indeed, in a profile picture, just the high half of your arms will be visible.

A little expert advice: try to imitate lifting heavy loads like at the gym, this will tighten your arms to your body and show the true width of your body.

08 - Put the device at the horizontal level of your neck

Reading this trick, you quickly wonder why? Well, know that when you look at a person at a lower level, you look more authoritarian and respectful.

BONUS !

09 - Try your reactions

Now you know how to take a successful profile picture. To perfect your image and remain unique, you can try reactions to feelings (surprise, joy, etc.).

Dear Travellers,

After experiencing the Declic Hotel experience, we are interested in your opinion!

Your testimony will allow us, on the one hand, to verify the quality of our services and on the other hand to know how to question ourselves when necessary.
